Acknowledgments

Acknowledgments

We acknowledge the invaluable assistance of many colleagues at the NOAA Office of Climate Observation, including Candyce Clark, Kathy Crane, Derrick Snowden, and Diane Stanitski, whose efforts were instrumental in developing the concepts and presentation of this report, and without whom the document could not possibly have been completed in timely fashion. In addition, Richard Rivera brought the report to life with his design and implementation of the artwork and the user interface. We are grateful to these modest and helpful professionals for doing the hidden work that was necessary to bring this report to fruition.
